

CONTROL  
**IGRANIC**  
SYSTEMS

**Igranic Control Systems Ltd**

**Designers & Manufacturers of Electrical Control Systems**

# The Company

Igranic Control Systems: a name synonymous with quality, reliability and punctual delivery has the technical expertise and engineering capability necessary for the production of the electrical and electronic control systems vital for today's industrial needs.

The name Igranic stems from the use of the rock granite in the formation of early resistors at the turn of the century and the Igranic of today whilst based in such tradition, looks forward to meeting future challenges head-on with commitment to continuing research and development.

*3.3kV Motor Control Centre*

Igranic's team of specialists utilise a high degree of expertise to endorse an established reputation for problem solving and innovation across a range of control gear that includes complete electrical packages with components specifically tailored to the customer's specification and application.

The practical management team have extensive knowledge of control systems, industrial applications, manufacturing, commissioning and system maintenance, together with the self-motivation required to provide the personal service their clients have come to expect.

*11kV Vacuum Circuit Breaker  
and Synchronising Instrumentation*

## Products

Electrical Motor Control Gear, the Company providing a total package of all technical and manufacturing aspects.

Individual Starters 11kV/6.6kV/3.3kV/415V

Motor Control Centres 11kV/6.6kV/3.3kV/415V

Vacuum Circuit Breaker  
Switchboards 11kV/6.6kV/3.3kV

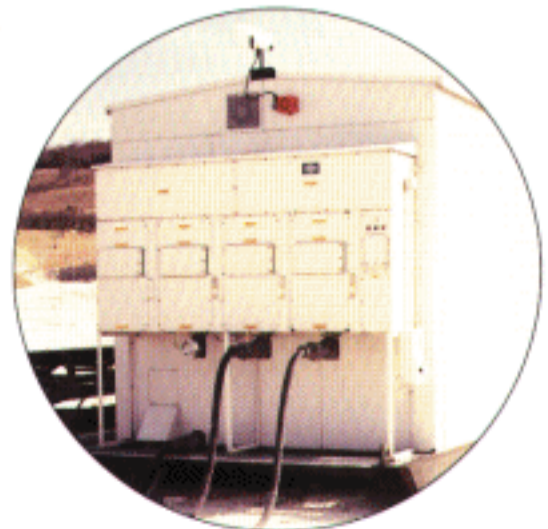

PLC Control

HV Neutral Earthing

LV and HV "specials"

Inverter and Drive Systems

Electrical Packages

*Mobile Substation*

Front cover Top: Double Compact 3.3kV MCC  
Middle: Power 2000 415V MCC/PLC  
Bottom: 11kV Vacuum Circuit Breakers

Rear cover Top: Compact 33 3.3kV Starter  
Middle: 11kV Auto-Transformer Starter  
Bottom: 6.6kV Local Isolation Unit
